

GB Page 1 of 3 Remove person from danger area. Supply person with fresh air and consult doctor according to symptoms. Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 01.11.2021 / 0003 Remove polluted, soaked clothing immediately, wash thoroughly with plenty of water and soap, in case of irritation of the skin (flare), consult a doctor. Unsuitable cleaning product: Solvent Thinners Skin contact Replacing version tatle / version: 24.07.2015 / 0002 Valid from: 01.11.2021 DDF print date: 01.11.2021 COSMO SP-890.110 COSMO SP-890,130 Eve contact (COSMOPLAST 720) Remove contact lenses. Wash thoroughly for several minutes using copious water. Seek medical help if necessary. (COSMOKLAR 718) Ingestion Safety data sheet Rinse the mouth thoroughly with water. Do not induce vomiting. Consult doctor immediately. according to Regulation (EC) No 1907/2006, Annex II Danger of aspiration. In case of vomiting, keep head low so that the stomach content does not reach the lungs SECTION 1: Identification of the substance/mixture and of the **4.2 Most important symptoms and effects, both acute and delayed** If applicable delayed symptoms and effects can be found in section 11 and the absorption route in section 4.1. In certain cases, the symptoms of poisoning may only appear after an extended period / after several hours. company/undertaking 4.3 Indication of any immediate medical attention and special treatment needed 1.1 Product identifier n.c. COSMO SP-890.110 **SECTION 5: Firefighting measures** COSMO SP-890.130 5.1 Extinguishing media (COSMOPLAST 720) Suitable extinguishing media CO2 Extinction powder (COSMOKLAR 718) White mineral oil (Natural oil) Registration number (ECHA): --Unsuitable extinguishing media EINECS, ELINCS, NLP, REACH-IT List-No.: 232-455-8 CAS: 8042-47-5 ter jet 5.2 Special hazards arising from the substance or mixture In case of fire the following can develop Oxides of carbon 1.2 Relevant identified uses of the substance or mixture and uses advised Toxic dases 5.3 Advice for firefighters against For personal protective equipment see Section 8. In case of fire and/or explosion do not breathe fumes. Relevant identified uses of the substance or mixture: Cleaning product Care product Protective respirator with independent air supply. According to size of fire Full protection, if necessary. Sector of use [SU]: SU22 - Professional uses: Public domain (administration, education, entertainment, services, craftsmen) Cool container at risk with water. Dispose of contaminated extinction water according to official regulations. Uses advised against: No information available at preser **SECTION 6: Accidental release measures** 1.3 Details of the supplier of the safety data sheet Weiss Chemie + Technik GmbH & Co. KG Hansastrasse 2 6.1 Personal precautions, protective equipment and emergency procedures 35708 Haiger 6.1.1 For non-emergency personnel Tel: +49 (0) 2773 / 815-0 msds@weiss-chemie.de www.weiss-chemie.de In case of spillage or accidental release, wear personal prevent contamination. Ensure sufficient ventilation, remove sources of ignition. Avoid dust formation with solid or powder products. nal protective equipment as specified in section 8 to Leave the danger zone if possible, use existing emergency plans if necessary. Keep non-essential personnel away. Ensure sufficient supply of air. Remove possible causes of ignition - do not smoke. Qualified person's e-mail address: info@chemical-check.de, k.schnurbusch@chemical-check.de Please DO NOT use for requesting Safety Data Sheets Avoid contact with eyes or skin. 1.4 Emergency telephone number If applicable, caution - risk of slipping Emergency information services / official advisory body: 6.1.2 For emergency responders See section 8 for suitable protective equipment and material specifications. Telephone number of the company in case of emergencies: 6.2 Environmental precautions +49 (0) 700 / 24 112 112 (WIC) +1 872 5888271 (WIC) 6.2 Environmental precaduons If leakage occurs, dam up. Resolve leaks if this possible without risk. Prevent surface and ground-water infiltration, as well as ground penetration. Prevent from entering drainage system. If accidental entry into drainage system occurs, inform responsible authorities **SECTION 2: Hazards identification** 6.3 Methods and material for containment and cleaning up Soak up with absorbent material (e.g. universal binding agent, sand, diato dispose of according to Section 13. ous earth, sawdust) and 2.1 Classification of the substance or mixture Classification according to Regulation (EC) 1272/2008 (CLP) Do not wash away with water or watery cleaning agents 6.4 Reference to other sections For personal protective equipment see Section 8 and for disposal instructions see Section 13. 2.2 Label elements **SECTION 7: Handling and storage** Labeling according to Regulation (EC) 1272/2008 (CLP) Not applicat 2.3 Other hazards In addition to information given in this section, relevant information can also be found in section 8 and 6.1. No vPvB substance 7.1 Precautions for safe handling No PBT substance 7.1.1 General recommendations No substance with endocrine disrupting properties. Avoid formation of oil mist. Ensure good ventilation. Avoid contact with eyes. **SECTION 3: Composition/information on ingredients** Avoid long lasting or intensive contact with skin. Keep away from sources of ignition - Do not smoke. Eating, drinking, smoking, as well as food-storage, is prohibited in work-room. Observe directions on label and instructions for use. 3.1 Substances **7.1.2 Notes on general hygiene measures at the workplace**General hygiene measures for the handling of chemicals are applicable.
Wash hands before breaks and at end of work.
Keep away from food, drink and animal feedingstuffs.
Remove contaminated clothing and protective equipment before entering areas in which food is consumed. White mineral oil (Natural oil) Registration number (REACH) 01-2119487078-27-XXXX In 232-455-8 8042-47-5 EINECS, ELINCS, NLP, REACH-IT List-No. CAS 7.2 Conditions for safe storage, including any incompatibilities content % Classification according to Regulation (EC) 1272/2008 Store product closed and only in original packing. Not to be stored in gangways or stair wells. Protect from direct sunlight and warming. (CLP), M-factors 3.2 Mixtures Store cool. Store in a dry place 7.3 Specific end use(s) For the text of the H-phrases and classification codes (GHS/CLP), see Section 16. The substances named in this section are given with their actual, appropriate classification! For substances that are listed in appendix VI, table 3.1 of the regulation (EC) no. 1272/2008 (CLP regulation) this means that all notes that may be given here for the named classification have been taken into account. **SECTION 8: Exposure controls/personal protection SECTION 4: First aid measures** 8.1 Control parameters 4.1 Description of first aid measures GB) Chemical Name Oil mist, mineral Content First-aiders should ensure they are protected! Never pour anything into the mouth of an unconscious person! WEL-TWA: 5 mg/m3 (Mineral oil WEL-STEL: -excluding metal working fluids, ACGIH) Inhalation Draeger - Oil Mist 1/a (67 33 031) Monitoring procedures:

 WEL-TWA = Workplace Exposure Limit - Long-term exposure limit (8-hour TWA (= time weighted average) reference period) EH40. AGW = "Arbeitsplatzgrenzwert" (workplace limit value, Germany).
 (8) = Inhalable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (9) = Respirable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (12) = Inhalable fraction, Directive 2017/164/EU, Directive 2004/37/CE). (11) = Inhalable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (12) = Inhalable fraction, Respirable fraction in those Member States that implement, on the date of the entry into force of this Directive, a biomonitoring system with a biological limit value not exceeding 0.002 mg CdQ greatinine in urine (Viscative 2004/37/CE). (12) = UVIC STEL (Directive 2004/37/CE). | WEL-STEL = Workplace Exposure Limit - Short-term exposure limit (15-minute

(Directive 2004/37/CE). | WEL-STEL = Workplace Exposure Limit - Short-term exposure limit (15-minute reference period). (8) = Inhalable fraction (2017/164/EU, 2017/2398/EU). (9) = Respirable fraction (2017/164/EU, 2017/2398/EU). (10) = Short-term exposure limit value in relation to a reference period of 1 minute (2017/164/EU). | BMGV = Biological monitoring guidance value EH40. BGW = "Biologischer Grenzwert" (biological limit value, Germany) | Other information: Sen = Capable of causing occupational asthma. Sk = Can be absorbed through skin. Carc = Capable of causing cancer and/or heritable genetic damage. \*\* = The exposure limit for this substance is repealed through the TRGS 900 (Germany) of January 2006 with the goal of revision. (13) = The substance can cause sensitisation of the skin and of the respiratory tract (Directive 2004/37/CE), (14) = The substance can cause sensitisation of the skin (Directive 2004/37/CE).

8.2 Exposure controls

8.2.1 Appropriate engineering controls

Ensure good ventilation. This can be achieved by local suction or general air extraction. If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection should be worn.

Applies only if maximum permissible exposure values are listed here

Applies only in maximum permissione exposure values are insee here. Suitable assessment methods for reviewing the effectiveness of protection measures adopted include metrological and non-metrological investigative techniques. These are specified by e.g. EN 14042. EN 14042 "Workplace atmospheres. Guide for the application and use of procedures for the assessment of

exposure to chemical and biological agents

# 8.2.2 Individual protection measures, such as personal protective equipment General hygiene measures for the handling of chemicals are applicable. Wash hands before breaks and at end of work. Keep away from food, drink and animal feedingstuffs.

Remove contaminated clothing and protective equipment before entering areas in which food is consumed.

Eye/face protection: Tight fitting protective goggles (EN 166) with side protection, with danger of splashes.

Skin protection - Hand protection Protective gloves, oil resistant (EN ISO 374). Recommended

Protective nitrile gloves (EN ISO 374). Minimum layer thickness in mm: >= 0,35 Protective Viton® / fluoroelastomer gloves (EN ISO 374). Minimum layer thickness in mm: = 0.4 >= 0,4 Permeation time (penetration time) in minutes: >= 480 The breakthrough times determined in accordance with EN 16523-1 were not obtained under practical

conditions.

The recommended maximum wearing time is 50% of breakthrough time. Protective hand cream recommended.

Skin protection - Other:

Protective working garments (e.g. safety shoes EN ISO 20345, long-sleeved protective working garments).

Respiratory protection: Normally not necessary. With oil mist formation: Filter A P2 (EN 14387), code colour brown, white Observe wearing time limitations for respiratory protection equipment.

Thermal hazards: Not applicable

Additional information on hand protection - No tests have been performed. In the case of mixtures, the selection has been made according to the knowledge available and the

information about the contents.

Selection of materials derived from glove manufacturer's indications

Final selection of materials derived norm give manufacturer's indicators. Final selection of glove material must be made taking the breakthrough times, permeation rates and degradation into account. Selection of a suitable glove depends not only on the material but also on other quality characteristics and

varies from manufacturer to manufacturer

In the case of mixtures, the resistance of glove materials cannot be predicted and must therefore be tested hefore use

The exact breakthrough time of the glove material can be requested from the protective glove manufacturer and must be observed

8.2.3 Environmental exposure controls No information available at pre-
